### 1. Overview of the CASBEE for Real Estate Certification

CASBEE (Comprehensive Assessment System for Built Environment Efficiency) is a system that comprehensively evaluates buildings and structures in terms of their environmental performance including aesthetic appeal, in addition to each building's ability to reduce its environmental impact such as energy saving and resource conservation as well as recycling.

CASBEE for Real Estate Certification was developed with the aim of making use of the results of the environmental assessment of buildings under CASBEE in real estate evaluation. It scores buildings under each of the evaluation items in five categories, comprising "1. Energy & Greenhouse Gases", "2. Water", "3. Use of Resources & Safety", "4. Biodiversity & Sustainable Site", and "5. Indoor Environment". Based on the scores, the evaluation results are given one of four ranks: Rank S (Superior), Rank A (Very Good), Rank B+ (Good), and Rank B (Fulfill essentials).
