(2) Description of the Existing Loan to be Repaid

The description of the existing loan to be repaid is as detailed below. The Repayment is being made for the remaining 1.2 billion yen.

Furthermore, while break funding costs (Note 2) will arise with the Repayment, the decision to implement the Repayment was made comprehensively taking into account the mitigation of interest burdens until initial principal repayment date, etc. regarding such loan.

(Note 1) For details of the early repayments on September 30, 2016 and December 9, 2016, please refer to the press releases titled "Notice Concerning Partial Repayment (Early Repayment) of Loan" dated September 21, 2016 and December 2, 2016 issued by the Investment Corporation.

(Note 2) "Break funding costs" arises when early repayment of an existing borrowing is being made and the reinvestment interest rate is smaller than the base rate, and is calculated by multiplying the difference between the base rate and reinvestment interest rate by the principal amount of early repayment, prorated (365 days a year) based on the number of actual days until the next interest payment date from the day following the date of early repayment.
